## Prob 2a

$$\bullet (A \vee B) \rightarrow \neg C$$

$$= \neg(A \vee B) \vee \neg C$$

$$= (\neg A \wedge \neg B) \vee \neg C$$

$$= (\neg A \vee \neg C) \wedge (\neg B \vee \neg C)$$

$$\bullet \neg(\neg A \vee C) \rightarrow D \quad \bullet A$$

$$= (\neg A \vee C) \vee D$$

$$= \neg A \vee C \vee D$$

$$\textcircled{1} A \text{ and } \neg A \vee C \vee D \rightarrow C \vee D$$

$$\textcircled{2} A \text{ and } (\neg A \vee \neg C) \wedge (\neg B \vee \neg C) \rightarrow \neg C$$

$$\therefore C = \text{false and } C \vee D \Rightarrow \underline{D = \text{true}}$$

## Prob 2b

$$\bullet A \vee B$$

$$\bullet \neg B \vee C$$

$$\bullet \neg(A \vee C) \vee D$$

$$= (\neg A \wedge \neg C) \vee D$$

$$= (\neg A \vee D) \wedge (\neg C \vee D)$$
